

ABSTRACT OF THE DISCLOSURE

A foldable keyboard includes a ~~first~~first, second, and third keyboard units U1, U2, and U3 which are rotatably connected with one another by means of main ~~links 4 and 5~~links (4) and (5) disposed on ~~both sides~~side end surfaces of each unit. The first and second units U1 and U2 are rotatably connected by means of an auxiliary ~~link 6~~link (6) parallel to the main ~~link 4~~link (4), and the second and third units U2 and U3 are rotatably connected by means of an auxiliary ~~link 7~~link (7) parallel to the main ~~link 4~~link (4). The first unit U1 is formed with ~~recesses 38~~recesses (38) at four corners of a peripheral wall ~~member 12~~member (12) and the second unit U2 is formed with ~~projections 36~~projections (36) at four corners of an undersurface of the second unit U2 so that the ~~projections 36~~projections (36) are ~~engaged~~received in the ~~recesses 38~~recesses (38) when the first, second, and third units U1, U2, and U3 are ~~put on~~disposed (stacked) one upon another into a folded state.
